

LOUDSPEAKER OF THE YEAR, OVER £20,000 YG Acoustics Vantage

The Vantage is a compact three-way that is positioned between the Carmel 2 and Hailey 2 of YG Acoustics multi-award winning product range. Weighing in at a healthy 72kg each, the Vantage are fully passive, have a sensitivity of 87 dB, and have a list price of \$32,000US.

Vantage incorporates seven key YG technologies: (BilletCore, ForgeCore, Dual Coherent, ViseCoil, ToroAir, Cabinet Technology and FocusedElimination), and benefit from the same materials and precision production methods utilised in the flagship Sonja XV. The transducer enables listeners to enjoy the sonic hallmarks of the Hailey 2, at a much more accessible price.

Chris Martens concluded his review by saying, "They offer much of the sonic excellence of YG's terrific Hailey 2.2 loudspeakers, but at just 70% of the Hailey 2.2 price. What is more, in the right small-to-medium-sized rooms and played at sensible volume levels, sonic differences between the Hailey 2.2 and the Vantage become very difficult to discern. *Vive la Vantage*". +
